FINANCIAL LITERACY AND
DIGITAL PAYMENTS

2020-2021

Financial and Digital Literacy Objectives:

- 1) To provide the knowledge of financial literacy and digital literacy.
- 2) To clear the concepts of financial literacy.
- 3) To educate the students and women of self-help groups about financial planning.
- 4) To understand the factors of financial literacy and digital literacy.
- 5) To provide the knowledge of digital payment system.
- 6) To aware about the threats of digital payment.
- 7) To provide the knowledge regarding precaution of digital payments.

We are living in a digital world, where online marketing has become a crucial platform. Marketing companies attract the people with their products to purchase. They are giving some allowances for purchasing. Here has a need of financial literacy, to take the decision of purchase for needs and avoid unwanted needs. From the demonetization of Indian currency governments of India encourage the peoples to adopt the new techniques of digital payments. But it's facing so many problems. Our college is located in rural area and border of Maharashtra and Karnataka state. Students from the village are not literate regarding financial conditions. They are unknown about their financial conditions due to their parents are not sharing their economic conditions with them. They are unknown about the income sources and expenditure of family. So they are not taking any financial decision as well digital financial payments.

Financial literacy has become one of the top priorities for most of the world today as it is directly proportional to the economic growth of a country. It is alarming to know that the financial literacy rate in India is way behind other countries. According to a global survey, in India 73% of men and 80% of women in India are not financially literate as well as 26% of the adults in the richest 60% of households are financially literate, while 20% of the poorest 40% of households are financially literate. The survey reports that financial literacy in India has been significantly poor compared to the rest of the world. Financial literacy and education can be more effective when they help students develop skills in knowing how to achieve specific products and services.
