GREEN AUDIT REPORT

The term “Green” means Eco-friendly or not damaging the Environment. This can acronymically be called as “Global Readiness in Ensuring Ecological Neutrality” (GREEN). Green accounting can be defined as systematic identification, quantification, recording, reporting and analysis of components of ecological diversity and expressing the same in financial or social terms. “Green Auditing”, an umbrella term, is known by another name “Environmental Auditing”. There is a provision of green audit in college campus. A committee has been formed to monitor the proper conservation and plantation of the plants in the campus. As per the suggestions made by IQAC, Botany Department taken the responsibility to do Green Audit with cooperation of Principal and Green Audit committee. A report on green audit has been prepared by the Department of Botany, Govt. Degree College, Kurnool. This college was established in **1973** and Re-accredited with Grade “B⁺⁺” by NAAC in third cycle. The plants have been systematically identified by the Dept. of Botany. The green audit report has been discussed with Green audit committee with suggestions to increase greenery in campus. Extra efforts have been taken by the college to create environment consciousness amongst students. One major step in this regard is the extensive plantation program organized by NSS, and Green audit Committee, U.G students of Botany Department. Plantation is encouraged by the Principal and all Departments Faculty members to increase greenery and reduce carbon dioxide emission effects. Existing gardens are also maintained by the Dept. of Botany of this college. Extension programs also organized to create environment awareness and conservation of Biodiversity amongst the students and public.

Activities organized to create greenery and its conservation at college campus is as follows:

- ☐ Plantation of diversified species
- ☐ Vegetative propagation
- ☐ Uses of Medicinal plants
- ☐ Identification of Plant species

To create green cover, Eco-friendly atmosphere, pure oxygen at the college campus, plantation program is organized every year with involving all Students, Principal and all faculty members of various Departments. In this session Vanam-Manam, Janmabhoomi, VanaMahotsa and Jaganna pachathoranam programs were organized and key stone species, Ornamental, Avenue, Aquatic, Medicinal plants with rare and exotic beautiful trees was planted in Botanical garden and other parts of college campus. To keep the greeneries in the campus, we regularly maintain the gardens

which are looked after by paid staff under the guidance of Green audit committee members. Moreover, every year we try to plant new Plants.

Vegetative propagation:

To learn how to propagate vegetative garden, training program is organized for students every year by expert gardener. Students learned various propagation techniques like cutting, grafting, etc.

Uses of Medicinal plants:

There are many Medicinal plants in the Botanical garden which have Medicinal value. However the students are unaware of their use and they can't identify the particular plants. Therefore faculty of Botany department helps the students in identifying different medicinal plants with their scientific names and also their Medicinal use.

Identification of Plant species:

There are so many plant species present in the college campus. The faculty of Botany department audited and identified various plant species with the help of flora.

Objectives of the Green Audit Committee:

1. Verifying compliance: Verifying compliance with standards or best available techniques.
2. Identifying problems: Detecting any leakage, splits or other such problems with the operations and processes.
3. Formulating Environmental policy: Formulating the organization's Environmental policy if there is no existing policy.
4. Measuring Environmental impact: Measuring the environmental impact of each and every process and operation on the water, soil, worker health and safety and society at large.
5. Measuring performance: Measuring the Environmental performance of an organization against best practices.
6. Confirming Environmental management system effectiveness: Giving an indication of the effectiveness of the system and suggestions for improvement.
7. Providing a data base: Providing a database for corrective action and future plans.

8. Developing the organization's Environmental strategy: Enabling management to develop its Environmental strategy for moving towards greenery corporate and performance culture.
9. Communication: Communicating the Environmental performance to its stakeholders though reporting will enhance the image of the College.

General Steps:

1. Systematic and comprehensive data collection.
2. Documentation with physical evidences.
3. Independent periodic evaluation with regulatory requirements and appropriate standards.
4. Systematic and comprehensive improvement and management of existing

The audit process:

The present audit is a Pre-audit to collect the details required for external auditing and Pre-audit activities. The pre-audit activities include the following.

1. The sites / area / division that are to be audited, need to be determined and selected.
2. The audited were informed of the date of the audit enabled them to adjust and become used to the concept.
3. The audit scope were identified. The auditee was consulted when establishing the scope.
4. The audit plan was designed in such a way that it accommodated changes based on information gathered during the audit and effective use of resources.
5. Green Audit Committee and assignment of responsibility were established.
6. The chosen working papers were collected. This facilitated the auditor's investigations on the sites.
7. The background information on the facility including the facility' organization, layout and processes, and the relevant regulations and standards, were collected.
8. The background information on the site's historical uses, and the location of soil and groundwater contamination were collected.

Onsite audit activities:

The onsite audit includes

1. The opening meeting is the first step between the Green Audit team and dept. of Botany. In this meeting the purpose of audit, the procedure and the time schedule were discussed.
2. Site inspection is the second step for onsite activity. In this step the audit team discovered matters which are important to the audit but which were not identified at the planning stage

3. Onsite phase of the audit developed a working understanding of how the facility manages the activities that influence the environment.
4. If there is one works Assessed strengths and weaknesses of the auditee's management controls and risks associated with their failure were established.
5. Gathering audit evidence i.e. collecting data and information using audit protocol.
6. Communicatedwiththestaffoftheauditto obtainmostinformation.
7. Evaluatedtheauditevidenceagainsttheobjectivesestablishedfortheaudit.

Procedure followed:

The students were divided into four groups and under the guidance of the teaching staff of the Department of Botany, each group collected data on the assigned topics. The assigned topics were as follows.

1. Identification of Plant species and Bio-diversity.
2. AnalysisofWaterqualityandusage.
3. AnalysisofEnergyconsumptionandcosts.
4. Analysis of waste generation and disposal all the data were united and based on these, a report was formulated

Recommendations for Facilities

1. Installation of solar Panel can be suggested. To reduce the conventional power solar panel can be installed in the college.
2. Water conservation: Rain water harvest can be suggested
Rain water from the terrace of the building can be drained to the garden plants.
Runoff water can be directed to sink in to the percolation pits
3. Landscaping with plants that need little water saves fertilizer, labour and water.

Chemistry Laboratory

The Most Important Lab Safety Rule

- Dress appropriately
- Keep a tidy lab
- Know your lab safety symbols
- Handle chemical spills properly
- Know your safety equipment
- Test your skills in our Lab Safety simulation
- Dress for the Lab
- Know the Location of Safety Equipment
- Don't Eat or Drink in the Laboratory
- Don't Taste or Sniff Chemicals
- Don't Play Mad Scientist in the Laboratory
- Dispose of Lab Waste Properly

In-Charge of the Dept

V. INITIATIVES TAKEN FOR SAFETY OF STUDENTS:

- Students have been instructed to wear apron and goggles in the laboratory.
- A 'First Aid Box' with required medicines is kept available in the Chemistry laboratory.
- A 'Fire Extinguisher' is fixed in two laboratories.
- "Lab Safety Rules" were written on walls of the two Chemistry Laboratories.

A REPORT ON ENERGY AUDIT

INTRODUCTION:

The quantum of electricity usage in any institution reflects its progress in Academics, Research Potentiality. All Higher Educational Institutions basically require electric power for the infrastructural facilities such as class rooms, seminar halls, virtual class rooms, administrative block, various departments, laboratories, Library, JKC and MANA TV Hall. The filament bulbs, tube lights, CFL lamps, LED bulbs, fans, Air Conditioners, computers, backups, inverters electrical, electronic equipment used in the laboratories are the sources of electrical consumption in an educational institution.

The 'Energy Audit' team has collected information on the total number of different kinds of electrical and electronic appliances which are presently in use along with their power consumption ratings.

Energy Consumption data for the period Jun-2021 to August-2022	
Jun-21	1999
Jul-21	1722
Aug-21	2032
Sep-21	2189
Oct-21	2685
Nov-21	2291
De c-21	1701
Jan-22	1546
Feb-22	2315
Mar-22	3166
Apr-22	3869
May-22	2652
June-22	2730
July-22	3068
Aug-22	2948

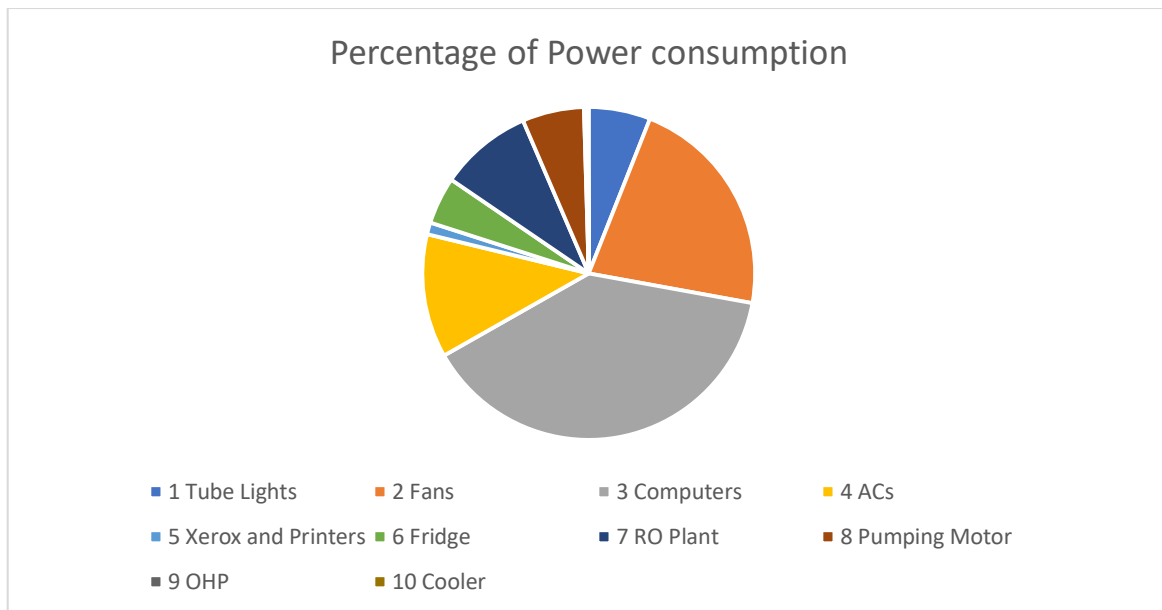

ANALYSIS OF DATA:

The above data is further analyzed so as to obtain the numerical information as shown in the given table.

Percentage power consumption of certain appliances out of total power consumption

S.NO	Name of Appliance	Number	Percentage of Power consumption
1	Tube Lights	180	6
2	Fans	120	21.84
3	Computers	138	38.9
4	ACs	14	12
5	Xerox and Printers	2+24	1.15
6	Fridge	5	4.58
7	RO Plant	1	9
8	Pumping Motor	1	6
9	OHP	8	0.37
10	Cooler	1	0.091

INFERENCE FROM THE DATA:

The 'Energy Audit' team after a detailed study arrived at the following inferences.

- ✚ For 14 Air Conditioners the electricity consumption percentage is 12%
- ✚ For 138 Computers the electricity consumption percentage is 38.9%
- ✚ For 112 Fans the electricity consumption percentage is 21.84%
- ✚ The electricity consumption percentage out of total consumption for 180 Tube lights is 6%.
- ✚ For 5 Fridges the consumption of electricity is 4.58%
- ✚ For 1 Pumping Motor the consumption of electricity is 1.83%
- ✚ For 2 Xerox Machines and 24 Printers the electricity consumption percentage is 1.15%
- ✚ For 8 OHPs the consumption of electricity is 0.37%
- ✚ For 1 Water Cooler the consumption of electricity is 0.09%
- ✚ The electricity consumption percentage of Computers is also high (25.2%).
- ✚ The electricity consumption of college is low in the months of Jan-2022 on account of Holidays due to Pongal Holidays.
- ✚ The electricity consumption of college is maximum in the months of April-22, July 2022 due to regular schedule of the College .

SUGGESTIONS FOR REDUCING POWER CONSUMPTION:

The 'Energy Audit' team on the basis of inferences of the study, proposes the following suggestions pertaining to the means to be implemented to cut short the Electricity consumption.

1. Presently the college has only 4panels of 'Solar Energy' installed for Skill Development Laboratory. The electricity consumption could be drastically reduced by establishing a few more Solar Energy panels in the college campus.
2. All the Class representatives of the Students are instructed to switch off fans and lights in the Laboratories and in class rooms when not necessary.
4. A centralized 'Switch Off' panel board should be arranged in respective wings.
5. The lights set for illumination in the common areas of the campus should be maintained with perfect timings.
- 6.All the tube lights and bulbs may be replaced by LED lamps in the college in order to further minimize energy consumption.

“The world has today 546 nuclear plants generating electricity. Their experience is being continuously researched and feedback should be provided to all. Nuclear scientists have to interact with the people of the nation and academic institutions continuously to update nuclear power generation technology and safety”

Description:

Messenger RNA (mRNA) is a single-stranded RNA molecule that is complementary to one of the DNA strands of a gene. The mRNA is an RNA version of the gene that leaves the cell nucleus and moves to the cytoplasm where proteins are made.
